PSA Group partnership with Hidria continues

Tolmin, 7.2.2018 - Hidria started working with the PSA Group 17 years ago. Today, HIDRIA is represented with diesel engine cold-start systems in all vehicle models of Citroën, Peugeot and DS Automobiles with diesel engines.

For PSA, we also equip their latest diesel engine with the DV5R 1.5-litre BlueHDI, which is installed for the first time in the Peugeot 308.

With a combustion chamber design derived from that of the Peugeot 908 HDi FAP diesel Le Mans racer, the 128bhp engine will eventually replace the 1.6-litre BlueHDI diesel across the 308 range.

Hidria is once again an exclusive supplier of premium glow plugs to PSA Group and with help of its products is the new 1.5-litre unit already compliant with tight Euro 6c emissions legislation.

Hidria Glow plug OEM: 5011 725 166

Hidria Glow plug: 5013 725 254

PSA code: 9809088180
